

Crickhowell Resource and Information Centre

Dec 2014

Version 0.3

ENVIRONMENTAL POLICY

Crickhowell Resource and Information Centre offers a variety of community services to Crickhowell and the surrounding area.

The Centre recognises its obligation to comply with all relevant environmental legislation and has regard to all appropriate guidance. Our main environmental impacts are a 7 day a week activity including the use of office consumables, in particular paper, energy and water consumption and cleaning materials in addition to an adjacent public toilet utility. We encourage and support activities which reduce, recycle, renew and reuse. Our aims are to:

- Minimise, recover and recycle waste wherever possible;
- Minimise the amount of energy used through the prudent use of resources.
- Reduce the use of water consumption.
- Train and continually update staff and volunteers in environmental issues.
- Measure the energy used annually and work towards reduction of usage where appropriate

An action plan with regular reviews will support this policy and be reviewed annually by the Trustees at the Board Meeting before the Annual General Meeting.

The Policy will be communicated regularly to all staff and made available to interested parties.
